

# ArcGIS Pro 3.2 Issues Addressed

Each [major, minor, and patch release](#) of ArcGIS Pro includes fixes for bugs that were reported to Esri Technical Support. The bugs that were fixed in ArcGIS Pro 3.2 are listed in the table below.

ArcGIS Pro 3.2 also includes a number of enhancement requests from Technical Support that were implemented. These are listed in the table below. See the [what's new topic](#) to learn about all of the extensive new functionality added at this release.

## Issues addressed at ArcGIS Pro 3.2.4

ArcGIS Pro 3.2.4 fixes the issue listed below and includes the fixes listed in the subsequent sections for ArcGIS Pro 3.2.0, 3.2.1, 3.2.2, and 3.2.3.

<b>Issue</b>	<b>Description</b>
<a href="#">BUG-000137374</a>	After splitting features created from a layer view with a view definition, one part of the Split Features does not display on the map instead of splitting the features into two or more features.
<a href="#">BUG-000151643</a>	ArcGIS to better support 'Always On load Balancing'.
<a href="#">BUG-000152559</a>	The date of the new feature class from the template is changed from 01/01/1970 to 30/12/1899 with a feature service referencing a geodatabase.
<a href="#">BUG-000155401</a>	The Error Inspector returns the error message, "Edit operation failed. The server took too long to answer. The client has timed out. (status code 28)." when running validation rules on a branch feature service in ArcGIS Pro.
<a href="#">BUG-000158635</a>	An unexpected null value error is sometimes returned during an attribute rule execution on the registered feature service (Oracle and PostgreSQL) when the first Arcade function is on a FeatureSet obtained from a geometry function such as Intersect.
<a href="#">BUG-000158798</a>	An event layer takes a long time to be loaded in ArcGIS Pro compared to previous versions.
<a href="#">BUG-000161519</a>	In a utility network, an edit fails when attempting to delete overlapping midspan vertices, and the error message, "Modify vertices failed. ERROR: Unable to complete operation., Operation rolled back., Operation rolled back." is returned.
<a href="#">BUG-000161861</a>	The Select By Location tool is incorrectly selecting features in different subtype group layers.
<a href="#">BUG-000162021</a>	Dashed lines are misaligned when vertices are added along a line and moved in small amounts. This issue affects both polygons and lines.
<a href="#">BUG-000162058</a>	When the workflow of the Run Pro GP Tool step is used with the workflow of the Question step within a job in ArcGIS Pro, the Question step pauses and fails to display the question automatically even when the Automatic option is selected.

<b>Issue</b>	<b>Description</b>
<a href="#">BUG-000162571</a>	Features with an attachment larger than 1GB fail to publish as hosted feature layers and leave orphaned tables in the ArcGIS Data Store.
<a href="#">BUG-000162793</a>	After appending parcels to a fabric, lines produced by building the fabric have gaps between some lines and parcels.
<a href="#">BUG-000162813</a>	The Feature on Feature check returns results for features that do not participate in the rule.
<a href="#">BUG-000163058</a>	When using ArcPy in a Python script, copying a feature class which has global IDs and inserting the feature class into a new one with the same schema takes more time than one without global IDs. The data size also increases significantly disproportionate for feature classes with global IDs. This also becomes more prominent with large datasets.
<a href="#">BUG-000163072</a>	When running the Build Parcel Fabric tool, Error 000952 and Error 999999 are returned.
<a href="#">BUG-000163254</a>	In ArcGIS Pro, rebuilding a spatial index on a branch versioned feature class changes the index properties from ALLOW_PAGE_LOCKS = OFF to ALLOW_PAGE_LOCKS = ON.
<a href="#">BUG-000163487</a>	The Create Database User tool fails on SAP HANA databases in ArcGIS Pro 3.2 and ArcGIS Pro 3.3.
<a href="#">BUG-000163636</a>	Improve the Change Version tool by caching attribute rules.
<a href="#">BUG-000163707</a>	Split editing operations on non-default branch-versioned feature services result in an error when not all target features are intersected by input features.
<a href="#">BUG-000163841</a>	While closing ArcGIS Pro, after clicking 'No' to save edits and clicking 'Cancel' to save the project, features no longer draw, and an error is returned in the Notifications pane.
<a href="#">BUG-000164049</a>	The Version Changes window does not display update differences when OID is selected.
<a href="#">BUG-000164147</a>	ArcGIS Pro crashes when appending after a join in ModelBuilder.
<a href="#">BUG-000164263</a>	The Import Parcel Fabric Points geoprocessing tool does not update extended attributes.
<a href="#">BUG-000164305</a>	The Change Version tool leaves a lock behind on a child version if the branch versioned utility network layers are added as subtype group layers.
<a href="#">BUG-000164803</a>	When editing a feature service published from branch-versioned data, the Planarize tool does not delete coincident line segments if line features are COGO enabled and COGO attributes are populated.
<a href="#">BUG-000164915</a>	ArcGIS Pro 3.2.1 crashes when the Distance option is used in the portal's Create Buffers tool with ArcGIS Enterprise 10.9.1 as an active portal.
<a href="#">BUG-000164955</a>	Allow altering certain field properties when assigned to an attribute rule.

<b>Issue</b>	<b>Description</b>
<a href="#">BUG-000165670</a>	Modifications made to the ArcGIS Pro editing workspace during an active edit session with versioned data return the error message, "Database error during feature draw. Target state not found in the STATES table".
<a href="#">BUG-000165688</a>	Enabling topology for the utility network (UN) data from the SAP HANA database causes ArcGIS Pro to crash.
<a href="#">BUG-000166238</a>	Dimensions are not created correctly when projected on the fly.
<a href="#">BUG-000166688</a>	Running the Migrate Object ID To 64 Bit tool can recreate the branch versioned class indexes incorrectly.
<a href="#">BUG-000166701</a>	Upgrading a geodatabase must resolve branch versioning metadata and data inconsistencies.
<a href="#">BUG-000166809</a>	The Join Features tool consistently excludes features with specific attributes from the output file.
<a href="#">BUG-000167096</a>	Editing traditionally versioned data in a single workspace edit session results in a notification database error when a feature drawing HY008 Operation is canceled.
<a href="#">BUG-000167150</a>	Using the RegisterWithGeodatabase function on a database view in ArcGIS Pro 3.2 and later, makes it inaccessible for ArcGIS Desktop 10.8.2.
<a href="#">BUG-000167185</a>	Unable to save a raster function in the Raster Functions pane on the Project tab as expected in ArcGIS Pro 3.2.2.
<a href="#">BUG-000167241</a>	Unable to create a feature-linked annotation with a branch versioned dataset.
<a href="#">BUG-000167251</a>	In ArcGIS Pro 3.2, Snowflake data is no longer listed under new database connections.
<a href="#">BUG-000167508</a>	Unable to open a map containing new layer types.
<a href="#">BUG-000167613</a>	ArcGIS Workflow Manager Server does not clear geodatabase locks on a branch-versioned feature service when the ArcGIS Pro step is paused or stopped.
<a href="#">BUG-000168722</a>	Enhance the performance of the asynchronous applyEdits operation status check.
<a href="#">BUG-000168781</a>	Fix memory leak when executing SQL using OCI.
<a href="#">BUG-000168848</a>	Related records do not display in the Attributes window for feature classes participating in a trace network.
<a href="#">BUG-000169310</a>	Update the 'Add Portal Items to Catalog Dataset' tool to write JSON inside the cd_itemsource attribute, conforming to the ArcGIS API for JavaScript specifications.
<a href="#">BUG-000169662</a>	The Space Time Kernel Density tool is generating incorrect results.
<a href="#">BUG-000176117</a>	Stop querying for all fields if they aren't visible in a service.

## Issues addressed at ArcGIS Pro 3.2.3

ArcGIS Pro 3.2.3 fixes the issue listed below and includes the fixes listed in the subsequent sections for ArcGIS Pro 3.2.0, 3.2.1, and 3.2.2.

<b>Issue</b>	<b>Description</b>
<a href="#">BUG-000167216</a>	Failed to register with geodatabase a spatial table in SDO_GEOMETRY or a spatial view if login contain character \$ like gen\$env and returns the error, "Only the data owner may execute register with geodatabase."

## Issues addressed at ArcGIS Pro 3.2.2

ArcGIS Pro 3.2.2 fixes the issues listed below and includes the fixes listed in the subsequent sections for ArcGIS Pro 3.2.0 and 3.2.1.

<b>Issue</b>	<b>Description</b>
<a href="#">BUG-000147443</a>	Improve Trim Archive History Geoprocessing tool to filter out duplicate trim attempts
<a href="#">BUG-000152055</a>	Unable to see differences in the Differences view when the layer has a join in ArcGIS Pro.
<a href="#">BUG-000153273</a>	Using the Edit Vertices tool to edit the location of utility network features moves the selected feature along with all associated features.
<a href="#">BUG-000154971</a>	In ArcGIS Pro, after editing a feature service referencing registered data from a PostgreSQL geodatabase for the first time, a dirty area is not displayed.
<a href="#">BUG-000155010</a>	The STArea() field displays different values based on the table view mode (For example, the Show All Records and Show Selected Records mode).
<a href="#">BUG-000156435</a>	In IDLE, when two Join Field operations are performed on the same feature class or the Join Features tool is used twice, the process fails on the second attempt.
<a href="#">BUG-000158240</a>	When creating an elevation profile, ArcGIS Pro fails to use the elevation source layer added to the ground if it is a dynamic image service.
<a href="#">BUG-000162106</a>	ArcGIS Pro stops responding when running the Save Toolbox To Version tool and the output toolbox's name contains special characters.
<a href="#">BUG-000162114</a>	When using the Aviation tools in ArcGIS Pro, the Terrain and Obstacle Profile element is unable to display when the regional format is set to Turkish.
<a href="#">BUG-000162118</a>	In ArcGIS Pro, when a layer is symbolized by unique values from a joined field, the error message "Requested operation could not be completed" is returned when the joined table is stored in a database and the database is not an enterprise geodatabase.

<b>Issue</b>	<b>Description</b>
<a href="#">BUG-000162448</a>	The Simplify By Straight Lines And Circular Arcs (SLACA) tool collapses 'donut-type' polygons. Running the Simplify By Straight Lines And Circular Arcs (Editing) tool on 'donut-type' polygons, geometry is turned to donut holes if the parcels have donut holes in them. The output polygon area is reduced to the donut hole area.
<a href="#">BUG-000162466</a>	The Align Parcels tool does not merge coincident points when projecting spontaneously.
<a href="#">BUG-000162762</a>	The arcpy.management.ExportDataChangeMessage function leaves temporary files, filling up the C drive.
<a href="#">BUG-000162843</a>	The PDFs exported with Simulate Overprint with the spot-replaced colors attribute, produce missing features and incorrect color values.
<a href="#">BUG-000162878</a>	Export Features in ArcGIS Pro does not support editing field properties when exporting from ArcGIS Online hosted feature service.
<a href="#">BUG-000163060</a>	The Export Data Change Messages geoprocessing tool causes ArcGIS Pro to crash when the output change file path uses a Universal Naming Convention (UNC) to export a file geodatabase.
<a href="#">BUG-000163123</a>	The arcpy.management.ImportMessage function leaves behind temporary files when it is not run in ArcGIS Pro.
<a href="#">BUG-000163124</a>	The median values for an even number of records are incorrect when calculated using data engineering.
<a href="#">BUG-000163239</a>	The Distance Allocation geoprocessing tool crashes when the source raster dataset does not have an attribute table.
<a href="#">BUG-000163247</a>	In ArcGIS Pro 3.2, clicking a feature with the Explore tool active does not display attributes from a related table unless the table is added to the map. Meanwhile, in ArcGIS Pro 3.1.3, the table does not need to be added to the map for the related record attributes to be displayed.
<a href="#">BUG-000163266</a>	The TableDefinition.FindField() method is not working in the SQLite database in ArcGIS Pro SDK 3.2.
<a href="#">BUG-000163333</a>	The Export Geodatabase To S-57 (Maritime) tool fails with errors while it is executed successfully in previous versions.
<a href="#">BUG-000163453</a>	In the multiple workspace edit session (Default setting) in ArcGIS Pro 3.2 (When the 'Enable and disable editing from the Edit tab' check box is unchecked), the file geodatabase edits are required to be saved or discarded before moving on to an enterprise workspace, because the unsaved edits prevent further edits to be made in the same file geodatabase workspace.
<a href="#">BUG-000163593</a>	Key processing is impacted in dockpanes that host WinForms-based content.
<a href="#">BUG-000163604</a>	In ArcGIS Workflow Manager (Classic), ArcGIS Pro crashes when clicking on an area of interest in an embedded map.
<a href="#">BUG-000163827</a>	The Train Point Cloud Classification Model tool fails with Error 032659.

<b>Issue</b>	<b>Description</b>
<a href="#">BUG-000163835</a>	ArcGIS Pro crashes when accessing error layers from ArcGIS Data Reviewer after using the 'Polygon Gap is Sliver' check.
<a href="#">BUG-000163860</a>	The Generate Schema Report tool fails when run against a feature dataset with a parcel fabric that has a parcel type and 'Use for administrative boundary' enabled.
<a href="#">BUG-000163925</a>	arcpy.mp MoveLayer RuntimeError for BuildingLayers
<a href="#">BUG-000163967</a>	ArcGIS Pro stops responding when running the Build Network tool.
<a href="#">BUG-000164021</a>	The Cell items in the ArcGIS Business Analyst Pro infographic editor table menu are not translated to Japanese.
<a href="#">BUG-000164136</a>	The Optimal Path As Line tool can get stuck in an infinite loop.
<a href="#">BUG-000164164</a>	The Solar Radiation tools from a custom Python script tool or a Python toolbox crash.
<a href="#">BUG-000164394</a>	The analysis from the Feature Solar Radiation tool results in all zeros.

## Issues addressed at ArcGIS Pro 3.2.1

ArcGIS Pro 3.2.1 fixes the issues listed below and includes the fixes listed in the subsequent section for ArcGIS Pro 3.2.0.

<b>Issue</b>	<b>Description</b>
<a href="#">BUG-000145006</a>	In ArcGIS Pro, using a UNC (Universal Naming Convention) path displays a slower performance than a mapped drive path compared to ArcMap.
<a href="#">BUG-000153115</a>	The ArcGIS Maps SDK for JavaScript Editor widget does not respect the feature template on a hosted feature layer.
<a href="#">BUG-000158118</a>	Creating a new model fails in ArcGIS Pro with the new toolbox (.atbx) format on a network drive.
<a href="#">BUG-000160944</a>	Unable to register an external table that contains the GDB_GEOMATTR_DATA column with an enterprise geodatabase.
<a href="#">BUG-000161858</a>	Deleting a point in a utility network with the Edit Vertices tool selected causes ArcGIS Pro to crash.
<a href="#">BUG-000162168</a>	The COGO-enabled traverse stores the incorrect distance in the Distance field when the feature class is projected on the fly.
<a href="#">BUG-000162322</a>	The Detect Bright Ocean Objects tool output has bugs.
<a href="#">BUG-000162324</a>	In ArcGIS Pro, the Export Raster function crashes for newer Capella data layers.
<a href="#">BUG-000162828</a>	When using PostgreSQL, fail to delete the topology feature in BigOID mode.
<a href="#">BUG-000162829</a>	PostgreSQL returns FDO_E_ROW_OID_OVERFLOW for UpdateGeometry
<a href="#">BUG-000163950</a>	Some geoprocessing tools are not translated to the Czech language.

## Issues addressed at ArcGIS Pro 3.2.0

ArcGIS Pro 3.2.0 fixes the issues and adds the enhancements listed below.

<b>Issue</b>	<b>Description</b>
<a href="#">BUG-000094097</a>	The code block of the Calculate Field tool does not get updated when importing a calculation file for the tool in a model created in ArcMap.
<a href="#">BUG-000100896</a>	adding new groups in the customize GP gallery window until they are off screen results in the label for the last group displaying outside the window
<a href="#">BUG-000106534</a>	An error is returned when executing the Truncate Table tool against a non-versioned feature class with attachments in ArcGIS Pro 2.0.
<a href="#">BUG-000106610</a>	AddDeleteFieldToFromFeatureClass ArcGIS Pro SDK community sample 2.0 hangs if the button is clicked without opening an attribute table.
<a href="#">BUG-000109285</a>	No exception is returned and the function becomes unusable after certain ArcPy functions are called incorrectly.
<a href="#">BUG-000109315</a>	The buffered gradient fill for a shape marker of a point symbol in ArcGIS Pro is not honored if the outer color is set as No Color.
<a href="#">BUG-000109404</a>	Standalone scripts for adding a Python toolbox (.pyt) using the arcpy.AddToolbox function fails with the following error message, "Toolbox does not exist" returned when using the variable 'toolbox' to define the toolbox path or any other value in the scri
<a href="#">BUG-000110112</a>	Pro 2.1 does not display Vector Product Format (VPF) data which is supported in ArcGIS Desktop.
<a href="#">BUG-000110128</a>	Unable to apply a map to the return Layout object of the ConvertLayoutFileToLayout method.
<a href="#">BUG-000110323</a>	More clarification about using the Delete tool in the ArcGIS Pro documentation.
<a href="#">BUG-000111714</a>	A green warning message, "Could not analyze datasets DatabaseName.DataOwner.FeatureClass. (You might not have sufficient permissions.)" is returned when working with the Esri Binary data type.
<a href="#">BUG-000112429</a>	When adding a custom toolbox to a new project in ArcGIS Pro 2.1.2, the toolbox does not display in Toolboxes in the Geoprocessing pane.
<a href="#">BUG-000113870</a>	In ArcGIS Pro, layers using the grouped Unique Values symbology published to ArcGIS Online as a hosted feature layer do not retain the grouped symbology when brought back to ArcGIS Pro from the Portal tab.
<a href="#">BUG-000113925</a>	When using multi-field requests with the ArcGIS World Geocoding Service, there are accuracy problems with specific Chinese addresses.

<b>Issue</b>	<b>Description</b>
<a href="#">BUG-000114174</a>	2525c symbols fail to render properly.
<a href="#">BUG-000116016</a>	The ArcGIS Online World Geocoding Service incorrectly plots locations matched to Black Mountain Rd, San Diego, CA.
<a href="#">BUG-000116032</a>	When a script is run that creates domains in a feature class, these domains are successfully created. If a second script is run that creates additional domains, these domains would not appear until ArcGIS Pro is closed and relaunched.
<a href="#">BUG-000116094</a>	Running the 'listSymbolsFromGallery' method through a Python script from a Python toolbox in ArcGIS Pro fails to identify symbols from a custom-style file saved to a folder location.
<a href="#">BUG-000118545</a>	The geoprocessing window in ArcGIS Pro does not always cursor into a newly added field when the Enter key is used on tools that accept several entries for one parameter.
<a href="#">BUG-000119155</a>	When deleting a join used in a definition query, no features are drawn to the map and no warning or information is shown as to why this is happening.
<a href="#">BUG-000119867</a>	Attempts to return connectionProperties from a map service layer file (.lyrx) using ArcPy resulted in an error.
<a href="#">BUG-000120040</a>	The Summarize Within tool fails when the Summary Fields parameter is specified as an enterprise geodatabase shape field.
<a href="#">BUG-000121975</a>	Unable to view related records when using web maps based on map services in ArcGIS Pro 2.3.2.
<a href="#">BUG-000124250</a>	In ArcGIS Pro, the Calculate Geometry tool is disabled on a feature class attribute if a table is joined to the feature class.
<a href="#">BUG-000124574</a>	Certain premium ArcGIS Living Atlas content layers do not successfully display in the legend of a map printed from ArcGIS Web AppBuilder.
<a href="#">BUG-000125587</a>	The Map.addLayer command fails with ValueError when attempting to add a layer created with the MakeFeatureLayer_management and MakeRasterLayer_management tools.
<a href="#">BUG-000126098</a>	In ArcGIS Pro, selecting an item with quotes or spaces in the multiValue parameter list with a Python tool results in inconsistent behavior and returns the error message, "ERROR 000800: The value is not a member of &lt;value&gt;."
<a href="#">BUG-000126355</a>	LayoutElementFactory.Instance.CreatePictureGraphicElement causes a memory leak in ArcGIS Pro.
<a href="#">BUG-000126667</a>	Unable to run the Add Surface Information tool on raster data.

<b>Issue</b>	<b>Description</b>
<a href="#">BUG-000127689</a>	WRL files imported into ArcGIS Pro display incorrect textures when the file name contains Chinese characters in a Chinese operating system.
<a href="#">BUG-000128070</a>	'Title' dynamic text for layouts is not directly accessible in ArcGIS Pro.
<a href="#">BUG-000128072</a>	The Map Series Best Fit Extent option erroneously clips index polygons in the output pages at certain percent values.
<a href="#">BUG-000128757</a>	Unable to change the alignment of a numerical field in the attribute table in ArcGIS Pro.
<a href="#">BUG-000128776</a>	For a mosaic dataset containing coincident rasters, ArcGIS Pro navigation tools identifies all the coincident pixels, but the value of each pixel is the same as the top pixel.
<a href="#">BUG-000128810</a>	Some geoprocessing services, such as PublishingTools and PrintingTools, crash when installing ArcGIS Data Interoperability in ArcGIS Pro on the same ArcGIS Enterprise machine.
<a href="#">BUG-000129329</a>	Tie points change to the same symbology as ground control points in certain ortho mapping projects in ArcGIS Pro 2.5.
<a href="#">BUG-000129468</a>	Annotations created in an annotation feature class in ArcMap do not preserve the anchor points, sizes, dimensions or orientations in ArcGIS Pro with Esri and third party fonts installed in the correct location.
<a href="#">BUG-000129669</a>	Printing a map and layout with the black and white option does not work in ArcGIS Pro 2.5.
<a href="#">BUG-000129843</a>	Using a multipatch shapefile causes the Make Query Table tool to return ERROR 999999.
<a href="#">BUG-000130522</a>	Exporting data to GeoJSON using the Features To JSON geoprocessing tool adds extra decimal places in double and float fields.
<a href="#">BUG-000130537</a>	The Calculate Prediction Zone tool crashes in ArcGIS Pro when using a large number of features as the input.
<a href="#">BUG-000130576</a>	Unable to reorder multiple fields by clicking the Shift button and dragging in the Feature Class To Feature Class tool in ArcGIS Pro 2.5.
<a href="#">BUG-000131112</a>	The annotation layer in ArcGIS Pro is shown underneath the other layers when the annotations are inside a group layer with 'Enable symbol layer drawing' enabled.
<a href="#">BUG-000131365</a>	When exporting a map layout with a transparent background to a PDF file in ArcGIS Pro, the background transparency is not honored.
<a href="#">BUG-000131422</a>	Unable to access a related data if a relate is created using the primary and secondary key fields of a feature class and an attachment table.

<b>Issue</b>	<b>Description</b>
<a href="#">BUG-000131512</a>	When creating a polygon graphic in a layout in ArcGIS Pro, the graphic changes shape and is larger than the envelope if zooming more than a certain scale into the layout.
<a href="#">BUG-000131798</a>	Creating thousands of graphic elements in an ArcGIS Pro layout eventually leads to the error message, "An unhandled exception of type 'System.ArgumentException' occurred in mscorlib.dll. Destination array was not long enough."
<a href="#">BUG-000132042</a>	The Replace Geometry tool fails on a registered feature service with null geometry fields for polygon or polyline data in ArcGIS Pro.
<a href="#">BUG-000132389</a>	The Mosaic To New Raster tool does not honor the resampling method in ArcGIS Pro when there is a change in resolution for the output raster.
<a href="#">BUG-000132477</a>	The chart symbology duplicates or is removed when a layout containing a polygon or line is exported in ArcGIS Pro.
<a href="#">BUG-000132537</a>	Sharing a project package duplicates data for reference mosaic datasets.
<a href="#">BUG-000132927</a>	Unable to present data in the Pie Chart widget with data published from an Oracle database as a registered service if the category field is selected as 'Shape.Area.' or 'Sharp.Len.'
<a href="#">BUG-000133083</a>	CADRG/ECRG: Image City Maps format displays Product Name as 'Unknown' when added to the mosaic dataset.
<a href="#">BUG-000133085</a>	The Shape_Area and Shape_Length fields do not display in the table frame for a layout view in ArcGIS Pro for an enterprise geodatabase feature class.
<a href="#">BUG-000133087</a>	The Select By Attribute and Select by Location tools do not have the options for docking on the side panel in ArcGIS Pro 2.6.
<a href="#">BUG-000133517</a>	Select Layer By Location fails when used as a scheduled task.
<a href="#">BUG-000134391</a>	Exported heat map's minimum and maximum pixel intensity configurations are not reflected from the ArcGIS Online utility print service.
<a href="#">BUG-000134494</a>	The first keyed-in digit remains in the non-nullable field after being erased from the attribute table.
<a href="#">BUG-000134608</a>	The closest facility solver produces different results for the same incident-facility pairs under some circumstances.
<a href="#">BUG-000134693</a>	ArcGIS Pro does not support the Add Relate function on a Microsoft Access Database (.accdb) table via an Object Linking and Embedding Database (OLE DB) connection.

<b>Issue</b>	<b>Description</b>
<a href="#">BUG-000135343</a>	The 'Allow stacked labels to straddle lines' option does not straddle the lines.
<a href="#">BUG-000135673</a>	The Segment Mean Shift (Spatial Analyst) tool does not create the necessary output when executed using Python.
<a href="#">BUG-000135934</a>	The error message, "ERROR 999999: Tile size should be greater than zero" is returned when using the Classify Pixels Using Deep Learning tool.
<a href="#">BUG-000135960</a>	Creating a relationship class with a database table in ArcGIS Pro returns the error message, "ERROR 999999."
<a href="#">BUG-000136122</a>	Service Definition remains in the arcgisserver output folder of the federated ArcGIS Server when publishing a hosted feature layer.
<a href="#">BUG-000137059</a>	Unable to get the correct statistics based on the second selection in ArcGIS Pro.
<a href="#">BUG-000137206</a>	The 'Aggregated Geometry' trace results do not honor the mid-span end when using a filter function barrier.
<a href="#">BUG-000137455</a>	The Cut Fill (Spatial Analyst) tool fails to execute once it is published from ArcGIS Pro to ArcGIS Enterprise if the window region in ArcGIS Enterprise is set as Lithuanian (Lithuania).
<a href="#">BUG-000137579</a>	PBF files display data for layers one level prior to the set visibility range in developer tools.
<a href="#">BUG-000137676</a>	In ArcGIS Pro, unable to remove duplicates using the Distinct Arcade function in the Dynamic Text tool for table attribute values.
<a href="#">BUG-000138052</a>	The vertical alignment of the annotations shift when migrating from ArcMap to ArcGIS Pro.
<a href="#">BUG-000138150</a>	The geoprocessing tool, arcpy.ListFeatureClasses() does not list the feature classes when the workspace is set to 'memory' or 'in_memory.'
<a href="#">BUG-000138577</a>	There is a vertical offset of the bounding box around the annotation when using imported Windows fonts.
<a href="#">BUG-000139264</a>	Arcpy.exportToTIFF() creates a different output than the Export Map functionality in ArcGIS Pro when a raster layer includes transparency.
<a href="#">BUG-000139563</a>	The ModelBuilder iteration is not completed if an apostrophe is in the attribute data.
<a href="#">BUG-000140085</a>	In ArcGIS Pro, using the analysis tools to join a hosted feature layer with many features to a hosted table fails with the error message, "Join Feature Failed."

<b>Issue</b>	<b>Description</b>
<a href="#">BUG-000140917</a>	ArcGIS Pro report does not honor 'Start on a new page' and 'Repeat on every page' associated with the group header when working with a related report.
<a href="#">BUG-000141322</a>	The error message, "Error 000840: The value is not a Feature Class" is returned when dragging and dropping feature class data from the Contents pane into the Input Feature Class parameter of the Rematch Addresses tool.
<a href="#">BUG-000141356</a>	The Ortho Mapping wizard in ArcGIS Pro 2.8.1 returns a warning message, "Warning: Cannot computer flight height from input parameters. Use relative altitude: 89.800 m. [Area3 001" when a DTM from an unfederated server is used as input.
<a href="#">BUG-000141565</a>	Even though a task is successfully completed, an error message, "The step xxx in task xxx is referencing a GP xxx that is not accessible" is returned.
<a href="#">BUG-000141632</a>	The Enable Enterprise Geodatabase option is still present after the database is enabled.
<a href="#">BUG-000142012</a>	The ground textures are missing when loading a Revit (.rvt) file in ArcGIS Pro 2.8.2.
<a href="#">BUG-000142413</a>	ArcGIS Pro 2.8.2 performs slower than ArcGIS Pro 2.5 when running the Create Vector Tile Package tool on a large dataset.
<a href="#">BUG-000142520</a>	The map grid label is incorrectly updated when adjusting the map grid's custom origin in ArcGIS Pro.
<a href="#">BUG-000142637</a>	Attempting to add a specific band from a multiband raster to the Raster Domain tool using the folder navigation option in the pane returns the Error 999999 and a generic error message.
<a href="#">BUG-000142703</a>	Grid graticules in ArcGIS Pro layouts display incorrect labels at specific intervals.
<a href="#">BUG-000143304</a>	In ArcGIS Pro 2.8.3, the Calculate Value tool in ModelBuilder with French language pack presents the data types in the wrong order, and the output cannot be used as expected.
<a href="#">BUG-000143483</a>	A raster does not render when zoomed in in ArcGIS Pro but renders properly in ArcMap.
<a href="#">BUG-000143725</a>	The Layer.SetDisplayCacheType method does not change the cache settings for the layer.
<a href="#">BUG-000143880</a>	The Multipatch To COLLADA tool does not populate the output folder with Chinese characters and returns the error message, "ERROR 160058: The dataset already exists".

<b>Issue</b>	<b>Description</b>
<a href="#">BUG-000143980</a>	If a field is added and calculated prior to an in-memory feature class before performing a spatial join, the output value of the field is truncated to the first character.
<a href="#">BUG-000144074</a>	When adding a Web Map Service (WMS) to a mosaic dataset, the images do not display.
<a href="#">BUG-000144137</a>	Remove f=json from requests sent to the server for OGC Feature layers in ArcGIS Pro.
<a href="#">BUG-000144327</a>	Incorrect latitude of origin definition on displayed files when using certain coordinate systems.
<a href="#">BUG-000144818</a>	The dataset containing a trace network is not added to the map along with the feature service when the service published from the dataset is added to the map in ArcGIS Pro.
<a href="#">BUG-000144887</a>	Cannot add fields to the attribute table of a TIFF raster through the Add Field option in ArcGIS Pro.
<a href="#">BUG-000145173</a>	Unable to clone the default Python environment on ArcGIS Pro with a Windows account name containing an accent.
<a href="#">BUG-000145402</a>	Geodatabase is locked when using the arcpy.Exists statement in an ArcGIS Pro notebook.
<a href="#">BUG-000145610</a>	In the Geoprocessing pane, a lock icon does not display the tools in the ArcGIS Production Mapping toolbox when a license is not available.
<a href="#">BUG-000145841</a>	The Forest-based Classification and Regression tool fails if the matched explanatory variables in the prediction dataset are in uppercase.
<a href="#">BUG-000146209</a>	Unable to add grouped user-definable values or reserved values for the class code renderer using the LAS dataset.
<a href="#">BUG-000146213</a>	After editing the item description metadata in ArcGIS Pro for a feature class and sharing it as a map service, the item description in an ArcGIS Server REST API service is displayed with the HTML style tag added.
<a href="#">BUG-000146541</a>	The "Runtime Warning: Glyph missing from current font" warning message is returned upon executing the Prepare Point Cloud Training Data tool in a Japanese environment in ArcGIS Pro.
<a href="#">BUG-000146690</a>	The fourth band of an MRF file is read as "Alpha" in ArcGIS Pro.
<a href="#">BUG-000146928</a>	The Validate Network Topology tool fails on a specific dirty area extent and returns the error message, "Error 999999 (Topology entry (from junction eid) not found.)"
<a href="#">BUG-000147106</a>	In ArcGIS Pro, attachments are not considered when creating a mobile map package with 'Area of Interest' and when the 'Keep only the rows which are related to features within the extent' checkbox is checked.
<a href="#">BUG-000147119</a>	Unable to find matched locations for batch geocoding on the composite locator in ArcGIS Enterprise 10.9.1.

<b>Issue</b>	<b>Description</b>
<a href="#">BUG-000147189</a>	When publishing a hosted feature service to ArcGIS Online from ArcGIS Pro, the resulting service is not displayed in Map Viewer if a field is invisible and contains a definition query created based on that invisible field.
<a href="#">BUG-000147223</a>	Unable to use the Name output variable from ModelBuilder's Iterate Feature Classes and Iterate Tables tools as an inline variable for the Copy tool in ArcGIS Pro 2.9 when Spatial Database Engine (SDE) tables or feature classes have a different schema than the SDE.
<a href="#">BUG-000147497</a>	In ArcGIS Pro, when Turkish (Turkey) is configured as the region language format in the operation system (OS) settings, the defined scale range does not display correctly for symbol categories with scales (for example, graduated colors) if the map's tile scale range list is customized by the loading scales for ArcGIS Online, Bing Maps, or Google.
<a href="#">BUG-000147516</a>	The Python code is modified after publishing to ArcGIS Server.
<a href="#">BUG-000148043</a>	When using both the dynamicLayers and spatialFilter parameters when exporting a map service, the dynamicLayers parameter takes precedence and the spatialFilter parameter is ignored.
<a href="#">BUG-000148077</a>	The downstream trace across tiers does not reach the target tier in some cases.
<a href="#">BUG-000148081</a>	Shadows indicating run tools are reset when connecting new tools to process containing a LIKE query.
<a href="#">BUG-000148161</a>	The Chinese character, '浬' is not displayed in the vector tile package in ArcGIS Pro.
<a href="#">BUG-000148398</a>	Full extent validate operations must not pass a spatial filter when fetching all dirty areas to improve performance.
<a href="#">BUG-000148499</a>	Broken Cartographic Information System (CIM) in Python when working with query layers.
<a href="#">BUG-000148668</a>	Long processing time when using the field calculator when the layer symbology is set to a large number of different symbol classes.
<a href="#">BUG-000148785</a>	In ArcGIS Pro, the error message, "Error 999999" is returned when the float value is divided by zero using the Calculate Field tool in ArcGIS Notebooks.
<a href="#">BUG-000148860</a>	Opening a layout referencing multiple inaccessible workspaces takes a long time.
<a href="#">BUG-000148872</a>	The KMZ file stops responding in ArcGIS Pro when running the KML To Layer tool, while it runs successfully in ArcMap.

<b>Issue</b>	<b>Description</b>
<a href="#">BUG-000148908</a>	The Portal for ArcGIS connection does not show any results when Hebrew is applied as a category of the organization content in ArcGIS Online.
<a href="#">BUG-000148940</a>	When a house number does not exist, ArcGIS Pro provides a wrong match address.
<a href="#">BUG-000149040</a>	In ArcGIS Pro 2.9.x, the Import Map command is not available when creating Task steps action from the All Commands list and List of Tabs.
<a href="#">BUG-000149046</a>	The Ignore Barriers At Starting Point parameter is not honored for Filter Barriers placed on line features.
<a href="#">BUG-000149082</a>	Network Directions apply the last traversed non-null street name to unnamed streets.
<a href="#">BUG-000149119</a>	The WKID 102498 coordinate system is not read as a valid coordinate system after the export and subsequent import of data.
<a href="#">BUG-000149274</a>	Relative paths are referenced for data sources, and auto-population of other parameters is prevented when a model is run as a tool in an (.atbx) toolbox.
<a href="#">BUG-000149291</a>	The utility network error is not created when a structure junction is placed coincident to a shared endpoint by electric lines with a different asset type.
<a href="#">BUG-000149393</a>	The Validate Network Topology tool fails and returns the error message, "Error building network: Topology Engine::query from_to_junctions(): Topology entry not found."
<a href="#">BUG-000149464</a>	The appearance of the Bilinear resampling type in ArcGIS Pro is blurry compared to ArcMap.
<a href="#">BUG-000149661</a>	The Make Layer From Selected Features option from the context menu is greyed out when working in a layout.
<a href="#">BUG-000149673</a>	The behavior of feature-linked annotation during editing does not maintain the defined distance to the feature.
<a href="#">BUG-000149709</a>	Editing or running a Spatial ETL tool from the ArcGIS Data Interoperability extension in ArcGIS Pro crashes the application.
<a href="#">BUG-000149737</a>	A geoprocessing service used in ArcGIS Pro or in the Geoprocessing widget fails when a private hosted feature layer is set as the input in the tool.
<a href="#">BUG-000149755</a>	The Download Map function does not work when a cached map service is in a folder and added directly with REST-URL.
<a href="#">BUG-000149908</a>	A comma is not transcribed as a decimal point but as a string when queried in SQL, for example,1,5.

<b>Issue</b>	<b>Description</b>
<a href="#">BUG-000149939</a>	Clone fails with the following error, "PermissionError: [Errno 13] Permission denied: 'C:\\Program Files\\ArcGIS\\Pro\\bin\\Python\\envs\\arcgispro-py3\\etc\\jupyter\\jupyter_notebook_config.json'."
<a href="#">BUG-000150098</a>	The Add Field tool takes longer when a layer is included in the map and has a unique value renderer with a lot of classes applied.
<a href="#">BUG-000150099</a>	Title configuration is not maintained for pop-ups within ArcGIS Pro.
<a href="#">BUG-000150123</a>	The Layer To KML tool does not reflect the input layer's extent in ModelBuilder.
<a href="#">BUG-000150197</a>	Model elements rerun when the tool properties are opened or the output is added to display when running the last tool in ModelBuilder.
<a href="#">BUG-000150210</a>	Performance issues were observed while working with a Web Map Service (WMS) in ArcGIS Pro.
<a href="#">BUG-000150286</a>	In ArcGIS Pro, starting points placed on point network features are not recognized as valid starting points.
<a href="#">BUG-000150399</a>	Unable to change the map scale after specifying a layer with a Fixed center constraint under the map frame properties.
<a href="#">BUG-000150723</a>	Non-default branch versioned feature services result in missing polygons when running the Split tool in the editing toolbar.
<a href="#">BUG-000150728</a>	Location units x and y coordinates in the map view do not show the plus sign for meters when editing the unit format in ArcGIS Pro.
<a href="#">BUG-000150822</a>	The Export Subnetwork Result Fields do not accept a value table.
<a href="#">BUG-000150892</a>	The Statistics tool behaves inconsistently on selected records in ArcGIS Pro.
<a href="#">BUG-000150968</a>	In ArcGIS Pro 3.0 Batch option of the KML to Layer tool does not add ground overlay mosaic to the map automatically.
<a href="#">BUG-000150977</a>	The Import 3D Files geoprocessing tool does not import textures from the VRML file (.wrl).
<a href="#">BUG-000151035</a>	Custom editor tracking field names in a parcel fabric causes some tools to fail.
<a href="#">BUG-000151161</a>	The Apply Symbology From Layer tool does not run when the Input Layer parameter is a TIN layer and the TIN layer that created the layer file (.lyrx) in the Symbology Layer parameter is deleted. Instead, the following error message, "Error 000968: The symbol layer does not match the input layer" is returned.
<a href="#">BUG-000151341</a>	The Enable Feature Binning tool returns the error 999999 when calculating the sum of a field with large values.

<b>Issue</b>	<b>Description</b>
<a href="#">BUG-000151444</a>	The world file cannot be exported as a JPEG file from the layout view.
<a href="#">BUG-000151614</a>	When changes are applied for the histogram adjustment in ArcGIS Pro, the image disappears (white screen) and appears with the changes.
<a href="#">BUG-000151692</a>	The error message, "Failed to create LAS dataset" is returned when creating a LAS dataset directly from the Catalog pane without enabling 3D Analyst extensions.
<a href="#">BUG-000151712</a>	The raster function template is not honored when applied to a multidimensional Cloud Raster Format (CRF) in Portal for ArcGIS 11.0.
<a href="#">BUG-000151723</a>	The Map To KML tool does not transform the map to the WGS 1984 datum if a transformation is required.
<a href="#">BUG-000151769</a>	The Convert Labels To Annotation tool does not convert all labels in ArcGIS Pro.
<a href="#">BUG-000151796</a>	In ArcGIS Drone2Map 2022.1, when creating an area measurement for a project using the State Plane projected coordinate system, the measured value is off by a factor of 10.
<a href="#">BUG-000151811</a>	The Import 3D files (3D analyst tool) does not show output textures after upgrading to ArcGIS Pro 3.0.

<a href="#">BUG-000155642</a>	The JSON To Features tool returns the error, "ERROR 999999" for having an empty JSON and GeoJSON file.

Issue	Description
<a href="#">BUG-000155660</a>	Definition queries do not appear as active after enabling the query and reopening the definition query again.
<a href="#">BUG-000155671</a>	When NITF (.ntf) rasters are added, the error message "External component has thrown an exception." is returned when the Windows regional format settings is set to Czech(Czechia).
<a href="#">BUG-000155682</a>	All fields can be configured despite checking the 'Text symbol required to be selected from the symbol table' check box.
<a href="#">BUG-000155690</a>	arcpy.Exists does not work with the Object Linking and Embedding Database (OLE DB) connection table in ArcGIS Pro 3.1.
<a href="#">BUG-000155706</a>	The Select Data tool selects the incorrect sublayer in ModelBuilder when the Add To Display option is enabled for input.
<a href="#">BUG-000155736</a>	The error message, "Underlying DBMS error [[Microsoft][ODBC Driver 17 for SQL Server][SQL Server]The instance of the SQL Server Database Engine cannot obtain a LOCK resource at this time." is returned when attempting to run a compress against the ArcGIS Enterprise geodatabase.
<a href="#">BUG-000155737</a>	The Realign Route tool fails and returns the error message: "error processing edits on Server" for exceptionally long routes.
<a href="#">BUG-000155761</a>	When using the suggest operation from the World Geocoding Service, if the text string contains "T ... #" (where the first three dots are one single ellipsis character), the following error message is returned: <code>{"error":{"code":400,"extendedCode":-21470248,"message":"Unable to complete operation.,"details":["bad allocation"]}}</code> .
<a href="#">BUG-000155773</a>	The project items in ArcGIS Pro 3.1 projects have invalid item properties when opened in ArcGIS Pro 3.0.3.
<a href="#">BUG-000155778</a>	The XML workspace document generated by the Create Replica tool fails with "error 999999" while importing it into another geodatabase.
<a href="#">BUG-000155785</a>	Unable to scroll down from the drop-down list using the mouse scroll wheel with the Add Line Event tool for the Location Referencing extension when adding an event.
<a href="#">BUG-000155810</a>	Unable to build parcels in the map extent with the 'Build Extent' Parcel Fabric command when having a GIS Professional Standard user type assigned. The error message, "Edit Operation Failed. This layer is controlled by a Parcel Fabric. To edit this layer you must be assigned a Parcel Fabric User Type Extension by the portal administrator." is returned.
<a href="#">BUG-000155819</a>	The attribute table of a joined layer in a mobile geodatabase does not open when a definition query with a subquery is applied to the join table.

<b>Issue</b>	<b>Description</b>
<a href="#">BUG-000155836</a>	Support linear referencing system (LRS) operations for Geographic Coordinate Systems (GCS) data with vertices sparsely spaced apart.
<a href="#">BUG-000155857</a>	Some geocoding inputs take a longer time to process and eventually results in a 504 Gateway Timeout error.
<a href="#">BUG-000155871</a>	When performing a realignment with abandonment, the 'Recalibrate route downstream' check box unchecked, and the point event layer's Calibrate Route event behavior rule set to 'Move', the upstream event record gets the Location Error value of "Route Location Not Found".
<a href="#">BUG-000155874</a>	A scene layer package (.slpk) returns incorrect attribute information after adding a 16,777,214 polygon multipatch feature class.
<a href="#">BUG-000155890</a>	A model stored outside the ArcGIS Pro project runs but does not process correctly when batched.
<a href="#">BUG-000155896</a>	Text callouts are cut off when using Print Layout to PDF ArcGIS Pro.
<a href="#">BUG-000155922</a>	Using most vector inputs to the Create Accuracy Assessment Points tool results in an error 999999 in ArcGIS Pro 3.0.3.
<a href="#">BUG-000155968</a>	ArcGIS Pro stops responding when editing or running Python code that calls the Geodesic Viewshed tool.
<a href="#">BUG-000155992</a>	The feature weight is ignored on point features with clustering enabled.
<a href="#">BUG-000156004</a>	Users are able to add duplicate topology rules in a parcel fabric, and those rules same as read-only rules fail to be deleted with the error message, "Error 160858: Cannot update a read-only parcel fabric rule" returned.
<a href="#">BUG-000156008</a>	The Model Arguments parameter cannot be populated after selecting the Model Type under the Train Deep Learning Model tool in ArcGIS Pro 3.0.3.
<a href="#">BUG-000156042</a>	Passing privileges on a feature class in SAP HANA through database roles does not work in ArcGIS Pro.
<a href="#">BUG-000156079</a>	When publishing a sync-enabled feature service, allow fields that do not participate in attribute rules or contingent values to be hidden.
<a href="#">BUG-000156089</a>	In Google BigQuery from ArcGIS, the error message, "Failed to load data. Invalid query: Could not cast literal "<datetime>" to type DATE" is returned when working with a query layer containing a unique identifier of the Date data type.
<a href="#">BUG-000156119</a>	Incorrect Unified Facilities Criteria (UFC) Transitional Surface is generated for Rotary-Wing Air Force and Army Service Types.
<a href="#">BUG-000156120</a>	Incorrect Unified Facilities Criteria (UFC) Approach Surface is generated for Rotary-Wing, Instrument, and all Service Types inputs.

<b>Issue</b>	<b>Description</b>
<a href="#">BUG-000156121</a>	Incorrect Unified Facilities Criteria (UFC) Clear Zone and Accident Potential Zone 1 surfaces are generated for Rotary-Wing types, all Service Types, and Flight Rules.
<a href="#">BUG-000156150</a>	ArcGIS Pro stops responding when opening the Export Topology Errors tool in the ModelBuilder window.
<a href="#">BUG-000156163</a>	The Merge tool in a model produced in ArcMap does not load certain source fields.
<a href="#">BUG-000156171</a>	In ArcGIS Pro, multiple vertices or control points can be selected but only the first selected vertex or control point is changed when using the 'Convert Vertex to Control Point' command and the 'Convert Control Point to Vertex' command.
<a href="#">BUG-000156203</a>	The layer package of a subtype group layer contains the subtype layers as additional layers.
<a href="#">BUG-000156241</a>	A Web Map Tile Service (WMTS) link works in ArcGIS Online but not in ArcGIS Pro.
<a href="#">BUG-000156251</a>	ArcGIS Pro 3.1 crashes when adding a GeoPackage file.
<a href="#">BUG-000156274</a>	ArcGIS Pro stops responding when using the Duplicate Parcels command if the parcel type feature layer in the Contents pane is renamed.
<a href="#">BUG-000156281</a>	Publishing a hosted feature layer from an uploaded file in ArcGIS Enterprise fails with an undefined error after installing ArcGIS Server 10.9.1 Utility Network and Data Management Patch 4 or ArcGIS Server 10.8.1 Utility Network Patch 9.
<a href="#">BUG-000156306</a>	The loading animation is stuck when using 3D files as the model file for multipatch features in ArcGIS Pro 3.1.
<a href="#">BUG-000156315</a>	ArcGIS Pro does not support International Foundation Class (IFC) files with the IFC Entity of IfcProxy when running the BIM File To Geodatabase tool.
<a href="#">BUG-000156328</a>	Pan sharpened imagery produces stripes or blocks when exported to a new raster in ArcGIS Pro.
<a href="#">BUG-000156329</a>	Running the Disable Parcel Topology tool results in Error 002138 and 160722.
<a href="#">BUG-000156344</a>	Sharing a feature layer as a web layer does not delete the temporary project folder in ArcGIS Pro.
<a href="#">BUG-000156356</a>	Offline areas downloaded from hosted feature services created from the Boom Placement template do not show the correct count in the Symbology pane and in charts created when the Calculate Field tool is used in ArcGIS Pro.

<b>Issue</b>	<b>Description</b>
<a href="#">BUG-000156359</a>	Poor performance with Select Associated Data in the Attributes pane when a large number of utility network features (1000 or more) are selected.
<a href="#">BUG-000156382</a>	The Export to CAD geoprocessing tool hangs when using a selection layer from an enterprise geodatabase as an input.
<a href="#">BUG-000156390</a>	When attempting to publish or analyze a feature service, the Share As Web Layer pane in ArcGIS Pro drops the hostname from the username and returns the error message, "Error 00231: Layer's data source must be registered with the server" when using an Azure PostgreSQL 11 geodatabase.
<a href="#">BUG-000156393</a>	In ArcGIS Pro 3.1, when the user-defined function is declared within a loop in the Arcade script, it returns the following error message, "Invalid expression. Function declaration only at global scope".
<a href="#">BUG-000156399</a>	When using ArcGIS Pro geoprocessing tools with the Input Raster parameter that accepts an image service, specifying an extent on the Parameters tab does not clear Error 001491.
<a href="#">BUG-000156401</a>	One of the feature classes with out beyond set in vector tile package which is generated in a flat tiling format does not display at any scales in ArcGIS Pro.
<a href="#">BUG-000156402</a>	When a project is reopened or a layout file is imported, a rectangle with rounded corners in the ArcGIS Pro layout is not visualized.
<a href="#">BUG-000156410</a>	The reference level field for certain features is displayed as 'Null' when reviewing Revit files in ArcGIS Pro.
<a href="#">BUG-000156421</a>	Provide a more informative error message when failures are encountered with a large number of starting points when running the Trace tool.
<a href="#">BUG-000156447</a>	The Remove Relate tool does not work on subtype group layers in ArcGIS Pro.
<a href="#">BUG-000156451</a>	Publishing a web map to Portal for ArcGIS with a minimum scale defined and selecting the 'Reference registered data' option in the publishing configuration results in an undesirable visibility range for all layers.
<a href="#">BUG-000156475</a>	Attempting to publish a map service to ArcGIS Enterprise 10.9.1 from the Python window in ArcGIS Pro 3.0.3 returns the error message, "ERROR 999999".
<a href="#">BUG-000156479</a>	The layout settings in a map series are not retained in the Layout Properties dialogue box once the dialogue box has been closed.
<a href="#">BUG-000156482</a>	The Re-Export Unacknowledged Messages geoprocessing tool fails to execute.

<b>Issue</b>	<b>Description</b>
<a href="#">BUG-000156491</a>	The referent fields are not displayed in event feature layers' properties when viewed through a feature service in ArcGIS Pro.
<a href="#">BUG-000156494</a>	In ArcGIS Pro, the copied layout does not reference to the respective map in the Contents pane.
<a href="#">BUG-000156515</a>	Exporting a layout as a PDF file with the CMYK color scheme fails to maintain the set symbology colors.
<a href="#">BUG-000156535</a>	Running the Make WCS Layer tool returns the error, "Error 999999."
<a href="#">BUG-000156539</a>	The Train Deep Learning Model tool does not create the model_metrics.html report, loss_graph.png, or show_results.png in ArcGIS Pro 3.1 (In ArcPy, it creates model_metrics.html).
<a href="#">BUG-000156567</a>	In ArcGIS Pro 3.1.0, a mosaic dataset used as a scene elevation surface cannot be shared as a web layer because the Share As Web Layer pane is disabled.
<a href="#">BUG-000156594</a>	Overwriting an existing image service does not allow for selecting an existing cache.
<a href="#">BUG-000156607</a>	The Sort tool does not have the Preserve Global IDs check box in the environment settings.
<a href="#">BUG-000156621</a>	Importing the .mxd file to ArcGIS Pro fails if the .mxd file contains a layer from a selected feature (data stored in a Spatial Database Engine).
<a href="#">BUG-000156627</a>	The JSON To Features tool fails to run in ArcGIS Pro when setting the output to a memory workspace.
<a href="#">BUG-000156642</a>	An SQL Server geodatabase connection does not correctly display the list of tables in the Catalog pane when the owner name matches the name of the database.
<a href="#">BUG-000156645</a>	The JSON To Features tool returns the error message, "Error 001558" when referencing features that have both a GlobalID field and a parentGlobalID field.
<a href="#">BUG-000156658</a>	The rematch address operation fails in ArcGIS Pro with the error message, "Edit operation failed. The value type is incompatible with the field type [Distance]" returned.
<a href="#">BUG-000156663</a>	When using the Traverse tool, Export Arcmap Traverse File does not work consistently.
<a href="#">BUG-000156665</a>	Attribute rules from the Address Data Management solution fails after upgrading to ArcGIS Pro 3.1.
<a href="#">BUG-000156681</a>	The full document path to internal drives and shared path are exposed within the document information. Including the title on a map service published from ArcGIS Pro within the REST interface.

<b>Issue</b>	<b>Description</b>
<a href="#">BUG-000156685</a>	In ArcGIS Pro, the Create Overpass and Create Underpass geoprocessing tools do not create the correct Margin Across and Margin Along parameters.
<a href="#">BUG-000156709</a>	Typing errors in Pro.settingsConfig XML sample in the 'Manage application settings' documentation cause the entire script to fail to execute.
<a href="#">BUG-000156710</a>	The Mask option and Snap Raster environment settings are disabled for a project created in ArcGIS Pro 2.9.0.
<a href="#">BUG-000156720</a>	The layout PictureElement_SetSourcePath method only updates the path in the element properties, but not the picture in the layout.
<a href="#">BUG-000156737</a>	The high-priority label parameter is not reflected in the exported PDF file from ArcGIS Pro 3.1.
<a href="#">BUG-000156744</a>	ArcGIS Pro 3.1 fails to open the DGN file and the error message, "External component has thrown an exception" is returned.
<a href="#">BUG-000156747</a>	Label placement and stack labels fails to constrain labels at the end and the start point of a line feature in ArcGIS Pro.
<a href="#">BUG-000156748</a>	When using the Autocomplete Polygon tool on a polygon with a default value, the value is not added to the attribute table.
<a href="#">BUG-000156755</a>	Curve geometry from DGN is displayed as straight lines in ArcGIS Pro.
<a href="#">BUG-000156756</a>	The Apply Event Behaviors tool produces incorrect results on point event layers.
<a href="#">BUG-000156763</a>	The post requires the current list of modified tables for a version prior to the posting operation.
<a href="#">BUG-000156764</a>	Using the != Python operator with a conditional in an ArcGIS Pro Network Dataset field script expression returns "Error 160410."
<a href="#">BUG-000156773</a>	The Revit file loses textures when added to ArcGIS Pro, but is well-presented in the Revit software.
<a href="#">BUG-000156781</a>	The range slider of a netCDF (network Common Data Form) file does not work correctly in ArcGIS Pro.
<a href="#">BUG-000156782</a>	ArcGIS Pro with the Japanese language pack does not translate the drop-down options of the Sort geoprocessing tool in the Fields parameter.
<a href="#">BUG-000156846</a>	Honor the Container split policy for nonspatial junctions and edge object contents when the container line is split.
<a href="#">BUG-000156853</a>	In an ArcGIS Pro layout, an Arcade expression which conditionally colors a part of the text (using the CLR tag) in a dynamic text does not work when the expression is not fully contained at the specified bounding size of the dynamic text box.

<b>Issue</b>	<b>Description</b>
<a href="#">BUG-000156873</a>	ArcGIS Pro changes the ModelBuilder Calculate Field expression type from Python 3 and Arcade to SQL
<a href="#">BUG-000156874</a>	In ArcGIS Pro, the Fields list is removed from the ModelBuilder's Calculate Fields tool.
<a href="#">BUG-000156875</a>	The ArcGIS Pro Calculate Field tool's documentation incorrectly states the default Expression Type is Python 3.
<a href="#">BUG-000156886</a>	Non-LRS (linear referencing system) edits to the calibration point features generate records in the LRS Edit Log.
<a href="#">BUG-000156896</a>	ArcGIS Pro 3.1 crashes when zooming in or out and panning around a map or layout in a project containing the Sentinel-2 imagery.
<a href="#">BUG-000156902</a>	When running the Identity tool, the following error message is returned even with a valid topology: "Error 160196: Invalid Topology."
<a href="#">BUG-000156905</a>	ArcGIS Pro 3.1 freezes when changing the symbology of a graphics layer and the rendering engine is set to OpenGL.
<a href="#">BUG-000156910</a>	ArcGIS Data Reviewer Ready to Use Rule - Features on the Feature check does not display any filter parameters on a feature service configured on the feature class of LRS network before publishing to ArcGIS Enterprise portal.
<a href="#">BUG-000156911</a>	Copying and pasting a utility network dataset from an enterprise geodatabase to a file geodatabase returns the error, "ERROR 000260: The domain is incompatible with the existing default value. The operation was attempted on an empty geometry."
<a href="#">BUG-000156927</a>	Using Alibaba Cloud Object Storage as a raster store causes raster analysis to fail.
<a href="#">BUG-000156931</a>	Unable to select features using the Explore tool or the Select tool from a view in a mobile geodatabase in ArcGIS Pro.
<a href="#">BUG-000156958</a>	CSV files containing tab-separated data with strings surrounded by quotes create a new row as soon as it contains line breaks.
<a href="#">BUG-000157009</a>	Some processing inputs used for suggested, reverseGeocode, and findAddressCandidates operations take a longer time to process and occasionally result in a 504 Gateway Timeout error.
<a href="#">BUG-000157020</a>	Inconsistent project results between the ArcGIS Pro project and Geometry Service from ArcGIS Online when converting from WKID: 3857 to WKID: 2881.
<a href="#">BUG-000157025</a>	The Parcel Seed tool in the Create Features pane is not immediately available after modifying group layers in the Contents pane.
<a href="#">BUG-000157041</a>	Some CAD files (.dwg) work in ArcGIS Pro 3.0.x but does not open in ArcGIS Pro 3.1 and return the error message, "External component has thrown an exception" or crash the software, or both.

Issue	Description
<a href="#">BUG-000157047</a>	When running the Apply Event Behaviors tool in ArcGIS Pro 3.1 with some datasets, more than 15 minutes are taken for the tool to run, even when edits are not being made.
<a href="#">BUG-000157056</a>	The error message, "External sharing process failed" is encountered when publishing a feature class from an enterprise geodatabase when there is a linear referencing system (LRS) feature dataset owned by a different user.
<a href="#">BUG-000157067</a>	In ArcGIS Pro 3.1, dictionary styles fail to display correctly with German regional settings.
<a href="#">BUG-000157085</a>	When a file downloaded using the BIM cloud connection is moved to a different folder, the property sheet tools do not download the most current version of the model.
<a href="#">BUG-000157092</a>	The MapFrame.Export() method returns the exception message, "MapView is not initialized" after creating a new MapFrame object on a layout in ArcGIS Pro SDK 3.1 for .NET.
<a href="#">BUG-000157093</a>	The placement of labels when a map is clipped in ArcMap and ArcGIS Pro returns different results.
<a href="#">BUG-000157094</a>	Getting inconsistent area calculation results of the same feature class in the same spatial reference when it is calculated by Calculate Field (Data Management) from ArcGIS Pro and Geometry Service from ArcGIS Online.
<a href="#">BUG-000157102</a>	In ArcGIS Pro 3.1 with a Japanese language pack, 'On-screen constraints' and 'Inference' words are still displayed in English.
<a href="#">BUG-000157105</a>	Enable Enterprise Geodatabase Tool fails on Azure SQL Database Managed Instance with AAD authenticated sde user with the following error:  "Failed to connect. ODBC 17 error: 40532, [Microsoft][ODBC Driver 17 for SQL Server][SQL Server]Cannot open server "database.windows.net" requested by the login. The login failed."
<a href="#">BUG-000157146</a>	In ArcGIS Online, the locator view suggestions are returning more languages than expected.
<a href="#">BUG-000157157</a>	The annotation tab in the Attributes view is not accessible for feature-linked annotations based on feature classes storing NULL values in a field that should be labeled.
<a href="#">BUG-000157167</a>	When merging parcels in a record-driven workflow, the error message, "Merge Feature Failed. The server took too long to answer. The client has timed out. (status code 28)." is returned, even after increasing the 'The maximum time a client can use a service' setting in ArcGIS Server Manager.

<b>Issue</b>	<b>Description</b>
<a href="#">BUG-000157168</a>	ArcGIS Pro 3.1 generates an empty authorize.txt file when authorizing licenses offline.
<a href="#">BUG-000157173</a>	The Upgrade Scene Layer tool fails, if the input path to the scene package layer (SLPK) contains non-ASCII characters (german, chinese, etc.).

<a href="#">BUG-000158727</a>	Function barriers lead to unexpected trace results when applied to junction objects with terminals and the Use Local Values option set to false.
<a href="#">BUG-000158738</a>	Redshift is unable to work with the database connection established with a non-default port.
<a href="#">BUG-000158741</a>	The Calculate Route Concurrencies tool returns unexpected results when a dominance rule is set up with a text field filled with zeroes.
<a href="#">BUG-000158747</a>	In the Join Field tool, the minimum and maximum merge rules do not give the correct output values in ArcGIS Pro 3.1.2.

Issue	Description
<a href="#">BUG-000158797</a>	Registering a feature class with Azure SQL geodatabase using the Register With Geodatabase tool fails and returns the following error, "ERROR 999999: Something caused the tool to fail. DBMS does not support this function".
<a href="#">BUG-000158834</a>	When using the World Geocoding Service, if an address information input is in the Belarusian language, the field information for City is not produced for the country of Belarus.
<a href="#">BUG-000158845</a>	Unable to get the correct statistics for the output raster of the Flow Accumulation geoprocessing tool in ArcGIS Pro 3.1.2.
<a href="#">BUG-000158846</a>	When using the Clip tool with multipatch features (Input Features) and a polygon layer with multiple non-overlapping polygons (Clip Features) sourced from a file geodatabase, the "Error 160196: Invalid Topology." error message is returned. All involved feature classes have a spatial index and the same spatial reference. No geometry problems are reported when running the Check Geometry tool for each feature class.
<a href="#">BUG-000158885</a>	The line layers participating in a parcel fabric display elevation units which do not match source units when added to a map.
<a href="#">BUG-000158890</a>	The EllipticArcBuilderEx.CreateEllipticArcSegment method returns incorrect results when a non-zero rotation angle is used.
<a href="#">BUG-000158898</a>	In ArcGIS Pro 3.1.2, saving an untitled project can result in creating endless recursion folders until it reaches the NTFS file system max limit.
<a href="#">BUG-000158909</a>	Delete operation on the scene layer does not delete the associated database in the standby tile cache data store.
<a href="#">BUG-000158911</a>	Unable to Retire Route error is returned for LRS in Location Referencing ribbon: "Unable to retire route" or "Retire Route Failed unexpectedly".
<a href="#">BUG-000158945</a>	The omega, phi, and kappa values are not imported when using an MRK file as the GPS source.
<a href="#">BUG-000158956</a>	Running the Create LRS Event From Existing Dataset tool in batch mode displays available fields for Route Name but returned the error message, "Error 130035: Invalid Field Name."
<a href="#">BUG-000158962</a>	Improve the trace performance when returning results that contain a large number of associations.
<a href="#">BUG-000158963</a>	Improve the performance of trace when returning aggregated geometry results.
<a href="#">BUG-000158967</a>	A map frame grid or graticule for a map series, with a map rotation pulled from a field and map clipping enabled, draws out of sync with the map frame, if the map had a non-zero rotation before the map series was authored.
<a href="#">BUG-000159007</a>	The attribute rule gives an incorrect count of features in a file geodatabase feature class.

<b>Issue</b>	<b>Description</b>
<a href="#">BUG-000159046</a>	The URL for 'Migrate the Product Library and NIS to ArcGIS Pro scripts' directs to an item not shared publicly in the following documentation: <a href="https://pro.arcgis.com/en/pro-app/latest/help/production/maritime/download-and-install-product-files.htm">https://pro.arcgis.com/en/pro-app/latest/help/production/maritime/download-and-install-product-files.htm</a> .
<a href="#">BUG-000159048</a>	The ArcGIS Data Store (Managed) appears twice in the Managed Registered Data Stores pane in ArcGIS Pro.
<a href="#">BUG-000159073</a>	Map.ChangeVersion() fails to change the version of the second map when using a branch versioned feature layer in ArcGIS Pro SDK for .NET 2.9.x and 3.1.x.
<a href="#">BUG-000159074</a>	The Append Routes tool fails with error, "Not implemented." when appending routes from a different file geodatabase.
<a href="#">BUG-000159091</a>	Invalid syntax for the 'Copy Python Command' when using the Kriging tool.
<a href="#">BUG-000159094</a>	Annotation features cannot be browsed in the Feature Outline Masks or Intersecting Layers Masks tools.
<a href="#">BUG-000159095</a>	Dynamic text populated from 'Project Metadata' cannot be displayed when exported to PDF.
<a href="#">BUG-000159111</a>	The Share As Web Layer tool returns the following warning message, "24043 Related layers or tables are not present in the map," when the related layers are in the map.
<a href="#">BUG-000159117</a>	The Export Subnetwork tool does not include domain descriptions in the JavaScript object notation (JSON) for text or string fields included in the Result Fields.
<a href="#">BUG-000159127</a>	Changing the alias of a utility network feature class field with subtypes causes sequential numbering edits of features in the field to fail with the "Edit operation failed. Field not found." error message returned.
<a href="#">BUG-000159165</a>	ArcGIS Pro crashes when adding interior ticks to a grid and saving the grid to a style.
<a href="#">BUG-000159167</a>	The scheduled execution of the Select Layer By Attribute tool does not function as expected in the ModelBuilder.
<a href="#">BUG-000159179</a>	Label expressions are cut off due to the string limit.
<a href="#">BUG-000159219</a>	The S-58 Error Manager tool validation incorrectly flags errors for the AidsToNavigationP.SIGSEQ attribute.
<a href="#">BUG-000159256</a>	The Find operation on a map service returns an error for the image layer in a mosaic dataset when the map service is published from ArcGIS Pro.
<a href="#">BUG-000159272</a>	The Traverse tool fails to create a line and returns no error when the spatial index grid size is invalid.

<b>Issue</b>	<b>Description</b>
<a href="#">BUG-000159285</a>	The Feature Outline Masks (Cartography) tool does not create output features when the 'All attributes' option is selected for the Transfer Attributes parameter.
<a href="#">BUG-000159286</a>	Contingent values do not display in ArcGIS Field Maps when published from ArcGIS Pro after using the Import Contingent Values tool.
<a href="#">BUG-000159316</a>	ArcGIS Drone2Map 2023.1.1 fails during processing and returns the "ERROR 999999: Something unexpected caused the tool to fail. Contact Esri Technical Support ( <a href="http://esriurl.com/support">http://esriurl.com/support</a> ) to Report a Bug, and refer to the error help for potential solutions or workarounds." error message if all available central processing unit (CPU) threads are used during processing.
<a href="#">BUG-000159354</a>	The Add Join tool fails and returns the error message, "Error 999999" when joining a CSV file to a feature class or shapefile if the Index Joined Fields check box is checked.
<a href="#">BUG-000159371</a>	A custom print service with the 'Only show features visible in the map extent' property checked in the legend filters feature services, but does not filter image services.
<a href="#">BUG-000159381</a>	In ArcPy, the updateDocsSecurity module specifies an unexpected value for the new_user_password property.
<a href="#">BUG-000159388</a>	Allow the ability to set minimum size values that are lower than 1 pt for proportional symbols in ArcGIS Pro 3.1.
<a href="#">BUG-000159403</a>	The line caps are visible at closing points when a polygon has the Suppress effect.
<a href="#">BUG-000159411</a>	The Create Hosted Imagery Layer wizard in ArcGIS Pro fails to upload data when publishing tiled or dynamic imagery layers.
<a href="#">BUG-000159444</a>	The ArcGIS Drone2Map processing engine generates blurry results in grassy areas and artifacts on the road lines and pavement.
<a href="#">BUG-000159445</a>	The simplification in the Offset effect can result in oversimplification with reference scales, resulting in unsmooth or broken results.
<a href="#">BUG-000159451</a>	When setting up a mosaic dataset, the creation of a 2D and 3D product fails.
<a href="#">BUG-000159474</a>	The active record is de-activated when using a task to update the record name in ArcGIS Enterprise.
<a href="#">BUG-000159492</a>	The Identify Narrow Polygons (Topographic Production) tool crashes in ArcGIS Pro.
<a href="#">BUG-000159493</a>	When querying utility network hosted feature layers and tables containing millions of features, HTTPS requests are extremely slow

Issue	Description
	when using the Select By Attributes tool on the features and tables while conducting a full table scan.
<a href="#">BUG-000159525</a>	Checking the 'May place label at secondary offset' option for a label placement strategy and converting labels to annotation results in the Feature ID equaling '0' for features placed at the secondary offset.
<a href="#">BUG-000159527</a>	The Generate Floor Transitions tool fails to complete with the warning "180299: Failed to create floor transitions".
<a href="#">BUG-000159530</a>	In ArcGIS Pro, tables within a feature service do not appear on the Resources tab of the Task Designer pane.
<a href="#">BUG-000159569</a>	Opening a web scene saved from Scene Viewer in ArcGIS Online opens with the error message "web map.External component has thrown an exception." in ArcGIS Pro on Windows 11 (for non-English operation systems).
<a href="#">BUG-000159572</a>	In ArcGIS Pro, the masked layer is not displayed when the layout or map is exported to PDF format.
<a href="#">BUG-000159579</a>	In ArcGIS Pro, the Utility Network connected traces do not honor User Defined Barriers when Filter Function Barriers are configured.
<a href="#">BUG-000159595</a>	Proportional circles exhibit size inconsistency when exporting the layout to an image or PDF.
<a href="#">BUG-000159611</a>	The scheduled execution of the XY Table To Point tool does not work as expected for the output when using a file geodatabase in the model builder.
<a href="#">BUG-000159620</a>	Publishing a map service from a raster dataset stored in an Amazon S3 bucket prompts the warning data to be copied to the server although the Amazon S3 bucket is registered with ArcGIS Server.
<a href="#">BUG-000159632</a>	A TIFF layer with Classify symbology is not displayed when exported to PDF or other file types.
<a href="#">BUG-000159684</a>	On the Location Referencing tab, the event tools are disabled after adding a linear referencing system (LRS) feature service to the map.
<a href="#">BUG-000159685</a>	The Identify Routes tool does not display route or measure information when moving the mouse pointer over the route if the LRS is being pulled from a branch versioned enterprise geodatabase connection.
<a href="#">BUG-000159686</a>	When the Aggregate Polygons geoprocessing tool is executed in ArcGIS Pro using the WKID 3006 projection, the specific distribution of polygons generates erroneous output.
<a href="#">BUG-000159694</a>	The Reassign Route tool unexpectedly fails and returns the following error message, "The input measures will result in a non-monotonic route".

<b>Issue</b>	<b>Description</b>
<a href="#">BUG-000159706</a>	Update the input information of the Band Arithmetic Raster Function Tool: Method MTVI2
<a href="#">BUG-000159720</a>	The adjust image altitudes function in ArcGIS Drone2Map incorrectly modified the values.
<a href="#">BUG-000159742</a>	Parts of symbols are missing from an imported symbology of an annotation feature class when changing the symbol ID in ArcGIS Pro.
<a href="#">BUG-000159762</a>	ArcGIS Pro stops responding when running a script tool with a selection layer.
<a href="#">BUG-000159766</a>	ArcGIS Pro fails to maintain the clip to boundary selection applied in the Map Properties dialog box while exporting the map series using a Python script.
<a href="#">BUG-000159775</a>	The Align Parcels tool's preview (blue dotted line) disappears when panning through a map in ArcGIS Pro.
<a href="#">BUG-000159785</a>	Updating the appearance of labels in custom grids is not preserved after zooming or saving a project.
<a href="#">BUG-000159792</a>	Changing the text symbol for a graphic layer's straight text moves the text to a different location on the map.
<a href="#">BUG-000159853</a>	Staging a Web Feature Service (WFS) using Python fails and returns the following error message, "[00297: <value> layers must be shared with everyone]".
<a href="#">BUG-000159870</a>	ArcGIS Pro 3.1.x crashes when adding certain DGN files to the map.
<a href="#">BUG-000159909</a>	Parcel locator roles return a score of 100 for a flawed input address.
<a href="#">BUG-000159921</a>	With a feature class without a coordinate system, ArcGIS Pro crashes when clicking Ready to Use Rules (Attribute Rules).
<a href="#">BUG-000159935</a>	The text symbol font styles do not produce expected results.
<a href="#">BUG-000159953</a>	Spatial Index is missing on an empty feature class.
<a href="#">BUG-000159960</a>	ArcGIS Pro stops responding when clicking the Retire button from the Location Referencing tab.
<a href="#">BUG-000159974</a>	Upon geocoding some addresses in Bronx, NY, the results do not return the expected Zip4 value.
<a href="#">BUG-000160030</a>	ArcGIS Workflow Manager does not respond while failing to open ArcGIS Pro project items to review data when an older ArcGIS Pro template is specified instead of an ArcGIS Pro map package.
<a href="#">BUG-000160068</a>	The batch calculation evaluation does not reset Validation Status to validationRequired.
<a href="#">BUG-000160096</a>	The output of the Detect Objects Using Deep Learning tool is abnormal when a mask is added in ArcGIS Pro.

<b>Issue</b>	<b>Description</b>
<a href="#">BUG-000160101</a>	The Calculate Geometry tool fails after changing the coordinate system in the environment settings of ArcGIS Pro.
<a href="#">BUG-000160164</a>	When the Create Seeds command is clicked twice, it returns with the error, "Lines in the map extent do not form valid closed loop".
<a href="#">BUG-000160181</a>	Images with filenames longer than 64 characters are dropped from ArcGIS Drone2Map 2023.1.1 projects despite appearing with a checkmark in the list of images to include in the New Project window.
<a href="#">BUG-000160190</a>	In the 'Add data store' pane in ArcGIS Pro, there is no scrollbar for the ArcGIS Server connections which leads to servers getting disconnected.
<a href="#">BUG-000160225</a>	ArcGIS Pro crashes while using the Create Map Tile Package tool if the output package type is a .tpk file and uses a custom tiling scheme.
<a href="#">BUG-000160234</a>	Fix manage page UX when a new feature class is added to a versioned feature dataset.
<a href="#">BUG-000160238</a>	The 'Build Frames and Cameras Tables' tool does not recognize the first row of the CSV and text (.txt) files in ArcGIS Pro 3.1.2.
<a href="#">BUG-000160258</a>	Timeout failures in ModelBuilder for some larger datasets when using the Delete Rows geoprocessing tool that has an ArcGIS Online hosted feature service as the input.
<a href="#">BUG-000160298</a>	A fixed extent constraint for a layer in a map frame layout is not respected when a custom projection is used in the map.
<a href="#">BUG-000160340</a>	Using keywords STORE_EXTENT and DO_NOT_STORE_EXTENT as the set parameters in the Recalculate Feature Class Extent (Data Management) tool returns the error message: "ERROR 000622: Failed to execute (Recalculate Feature Class Extent). Parameters are not valid. ERROR 000628: Cannot set input into parameter store_extent." in ArcGIS Pro.
<a href="#">BUG-000160351</a>	ArcGIS Pro crashes when using the Upgrade Dataset tool with the Japanese language pack.
<a href="#">BUG-000160358</a>	The database connection is not retained after creating project templates.
<a href="#">BUG-000160364</a>	The Elevation Guide Bar is not dynamic in the GPL or Generate Product output.
<a href="#">BUG-000160371</a>	The leader line should attach to the background symbol edge instead of the text outline.
<a href="#">BUG-000160398</a>	Z-values in non-metric units are converted to metric units when a Starting M value is specified for vertex m-values.

<b>Issue</b>	<b>Description</b>
<a href="#">BUG-000160414</a>	Unable to sync offline edits with referenced feature service from the SAP HANA published by a member with edit privileges and is not an owner of the data.
<a href="#">BUG-000160418</a>	The Aviation Update tool creates incorrect geometry for certain AirBoundaryArea polygons.
<a href="#">BUG-000160448</a>	The Locate pane for a locator returns unrelated results when searching for '100 Main St'.
<a href="#">BUG-000160453</a>	Using the Rebuild Indexes tool with the Rebuild Delta Tables Only option unchecked on a mosaic dataset within Oracle 19c crashes in ArcGIS Pro.
<a href="#">BUG-000160459</a>	Editing attributes reverts the text back to regular or bold when using any of the Narrow options with annotations.
<a href="#">BUG-000160464</a>	Null values set on the ArcGIS Pro feature template do not save with the default values.
<a href="#">BUG-000160472</a>	The Generate Routes tool in ArcGIS Pro is stuck at 15 percent progress and fails to complete the execution.
<a href="#">BUG-000160481</a>	When entering data for Label Text in the Scale Bar properties, the cursor repeatedly moves to the left.
<a href="#">BUG-000160497</a>	The Modify LRS tool erroneously returns Error 130066 when a new name is specified under the New LRS Name parameter.
<a href="#">BUG-000160504</a>	Fail to geocode an address using the Create Composite Address Locator tool created with the Japanese language pack in ArcGIS Pro.
<a href="#">BUG-000160516</a>	The Unified Facilities Criteria (Aviation) tool creates gaps and overlaps in surfaces.
<a href="#">BUG-000160564</a>	The Build Parcel Fabric tool returns Error 999999 and Error 000952.
<a href="#">BUG-000160566</a>	When exporting to PDF with the Simulate Overprint option checked, the map frame border is visible in the exported PDF.
<a href="#">BUG-000160585</a>	The tiling option in the Print Layout pane is disabled when the map frame in the layout is activated in ArcGIS Pro.
<a href="#">BUG-000160607</a>	Indices with Classify symbology cannot have their color ramp or the number of classes changed by default.
<a href="#">BUG-000160628</a>	When using the DEMs wizard with a large satellite imagery dataset (over 90 square kilometers), the following error message, "ERROR 003048: Input folder does not contain LAS files" is returned.
<a href="#">BUG-000160634</a>	Incorrect regional date formatting in the processing report.
<a href="#">BUG-000160635</a>	When calculating the Average Panel Reflectance value, the Radiometric Calibration dialog box displays a "Failed to compute panel reflectance factor error" error message.

<b>Issue</b>	<b>Description</b>
<a href="#">BUG-000160636</a>	The dense point cloud generation fails to generate on certain 3D projects.
<a href="#">BUG-000160637</a>	Deleting the measurement data does not clear the Mensuration Results pane.
<a href="#">BUG-000160638</a>	A crosshatch map is not generated with the German language pack (LP) and regional settings.
<a href="#">BUG-000160639</a>	Contour and measurement data are not deleted when deleting project data.
<a href="#">BUG-000160640</a>	Hosted scene layers display at incorrect elevations.
<a href="#">BUG-000160641</a>	The image rotation is not consistent for all regional languages.
<a href="#">BUG-000160642</a>	Batch processing starts when a project has broken image links.
<a href="#">BUG-000160643</a>	The JPEG file format is flagged as an unsupported image type.
<a href="#">BUG-000160644</a>	Processing is allowed without all required camera parameter values.
<a href="#">BUG-000160645</a>	Dewarp metadata from drones are not being verified.
<a href="#">BUG-000160646</a>	Add the ability to block updates in ArcGIS Drone2Map.
<a href="#">BUG-000160649</a>	After clicking the Recalculate From Measure button in the Realign Route tool, the To Measure value in the Realigned Route section is calculated instead of the From Measure value.
<a href="#">BUG-000160650</a>	In ArcGIS Pro, when using the Realign Route tool, the From Measure value in the Realigned Route section does not get backcalculated after typing a preferred To Measure value and clicking the Recalculate From Measure button.
<a href="#">BUG-000160668</a>	Aggregate geometry trace results with function barriers on user-provided network attributes in a trace network are returning the entire line.
<a href="#">BUG-000160675</a>	In ArcGIS Pro, attempting to add a User Datagram Protocol (UDP) stream returns the error message, "The player encountered an error during initialization and needs to close."
<a href="#">BUG-000160722</a>	ArcGIS Pro geocodes address even if the user does not have enough credits to run the process based on the estimated credits.
<a href="#">BUG-000160758</a>	The enhanced thermal camera support is to be metadata dependent.
<a href="#">BUG-000160793</a>	The Upgrade ArcMap Parcel Fabric tool does not generate parcel records with true curves.
<a href="#">BUG-000160797</a>	In ArcGIS Pro, the Data Interoperability extension Workbench does not load.
<a href="#">BUG-000160834</a>	The Reverse Routes tool introduces non-zero and negative non-zero values instead of clean zero values.

<b>Issue</b>	<b>Description</b>
<a href="#">BUG-000160866</a>	When using the Duplicate Parcels command to duplicate parcel features for a different parcel type, the duplicated lines have more records.
<a href="#">BUG-000160868</a>	The Image Centers symbology is reverted back to the default values after saving and reopening a project created from Mavic 2 Pro images.
<a href="#">BUG-000160923</a>	The SearchForSuggestion API returns an error that the input exceeds 200 characters for some input less than 200 characters.
<a href="#">BUG-000161000</a>	Incorrect line numbers are reported for invalid Arcade expressions.
<a href="#">BUG-000161015</a>	ArcPy geometry getArea and getLength with PRESERVE_SHAPE method, returns incorrect results due to projecting the geometry to WGS84.
<a href="#">BUG-000161022</a>	The points and lines graphics layer elements do not maintain position when the map is rotated.
<a href="#">BUG-000161077</a>	Labels in a vector tile package do not honor the label placement settings configured in the original feature layers.
<a href="#">BUG-000161110</a>	The DWG files are not located correctly in ArcGIS Pro.
<a href="#">BUG-000161112</a>	Reduce the memory footprint of ArcSOC by not cloning class definition.
<a href="#">BUG-000161130</a>	The Apply Parcel Least Squares Adjustment geoprocessing tool is slow on larger fabrics.
<a href="#">BUG-000161158</a>	The Import 3D Files tool crashes ArcGIS Pro with a .dae input.
<a href="#">BUG-000161303</a>	An error, "ERROR 000584" is returned after selecting Input Features for the Create Feature Locator tool in ArcGIS Pro set to Czech language.
<a href="#">BUG-000161415</a>	In ArcGIS Pro, the Clip Raster geoprocessing tool resamples a raster even when the Maintain Clipping Extent option is unchecked.
<a href="#">BUG-000161427</a>	2D ortho generated from ArcGIS Drone2Map is incorrect if using different rasters with the same names.
<a href="#">BUG-000161470</a>	Predicting using a spatial statistics model file fails and returns the following error message, "UnboundLocalError: local variable 'sharePredictValues' referenced before assignment".
<a href="#">BUG-000161570</a>	The 'Reset' and 'Reset Selected Item' options in the 'Customize the Ribbon' dialog box do not work.
<a href="#">BUG-000161623</a>	Using the Append tool to upsert data does not insert new rows when no match is found or the target is empty.
<a href="#">BUG-000161664</a>	The Save Web Map option is disabled when working with a project accessed from a network drive in ArcGIS Pro 3.1.3.
<a href="#">BUG-000161682</a>	An unknown error is returned when changing HistoricalVersion using DateTime in ArcGIS Pro SDK for .NET.

<b>Issue</b>	<b>Description</b>
<a href="#">BUG-000161710</a>	In ArcGIS Pro, the Create Point Cloud Scene Layer Content geoprocessing tool fails when the Target Cloud Connection parameter is set to Azure GovCloud Blob Storage.
<a href="#">BUG-000161813</a>	Honor directional devices when calculating flow direction in loops.
<a href="#">BUG-000161848</a>	ArcGIS Pro loops endlessly when adding CAD feature layers located within a DWG file to a map or when using the data as input features to the Export Features (Conversion) geoprocessing tool.
<a href="#">BUG-000161851</a>	In ArcGIS Pro, merging two polygons with a common edge using the Merge tool produces a multipart feature instead of a single feature if the common vertices have equal z-values.
<a href="#">BUG-000161932</a>	The layer file's symbology property of the output parameter in a model tool is not carried over to ArcGIS Server.
ENH-000086470	Add the functionality to change the font of the attribute tables in ArcGIS Pro, similar to the functionality in ArcMap
ENH-000101569	Allow database connection files to be added directly into the ArcGIS Pro project folder
ENH-000102786	Customize the Symbol used to represent a custom model in the Analysis Gallery
ENH-000104905	Provide the functionality of sub-folders within the Favorites folder for projections in ArcGIS Pro.
ENH-000105494	ArcGIS Pro does not have option to only show classes from a heading group of symbology in Legend.
ENH-000106949	Need Project browse dialog to be recognise Windows shortcuts in ArcGIS Pro.
ENH-000107975	Do not display groups that do not have project templates in ArcGIS Pro
ENH-000107980	Allow for sorting options for groups when looking at the Portal connection while creating a new project in ArcGIS Pro
ENH-000108243	Make network build type configurable to enforce a full, initial-like build with a parameter in the build-tool is really required
ENH-000113131	When exporting pages in a map series, allow the same Export Options available for PDF export to be available when exporting to other formats, e.g. PNG, JPG, etc.
ENH-000113670	Markers produced by graduated or proportional symbols on polygons draw in the annotation phase, meaning that labels draw on top of them, but annotation does not.
ENH-000114362	Include the ability to change the color of guides to support those with color blindness.

<b>Issue</b>	<b>Description</b>
ENH-000115056	Integrate ArcGIS Pro with Haivision's SRT open source protocol for delivery of MPEG-2 Transport Stream.
ENH-000115441	Add an "Executing...<tool name>..." line as a default message with the arcpy.GetMessages() tool in ArcGIS Pro python
ENH-000115928	Add the ability to rename pipelines which will more easily update all related records across multiple time slices
ENH-000116559	Add the ability to directly access the Vertical_Shift and Direction parameters from the Vertical Coordinate System in the ArcGIS Pro SDK API.
ENH-000117923	Provide the ability to create, delete, set, update, rename, import/export, and select bookmarks using python in ArcMap and ArcGIS Pro.
ENH-000118063	Create a Print Preview button in ArcGIS Pro
ENH-000118234	Inform users that they may not be able to run ArcGIS Pro indexing when logged out of their Windows account if they do not have the required Windows user privileges.
ENH-000118878	Add an Envelope parameter to the MapView.Export and Layout.Export methods to allow the specification of a specific geographic area when performing an export in ArcGIS Pro SDK
ENH-000119292	In ArcGIS Pro in Layout View, allow Graphic and Text Format pane to retain previously opened Gallery tab after being closed.
ENH-000120941	Allow users to change model settings where the environment settings do not supersede the model settings.
ENH-000123823	Allow transferring of a route that belongs to an existing line to a new line through Re-assign Routes in ArcGIS Pipeline Referencing.
ENH-000124263	Provide the ability to add data from Windows Explorer through Drag and Drop method to a Modelbuilder in ArcGIS Pro.
ENH-000124612	Create an error message when analyzing data that is not registered before publishing when Copy Data to Server is disabled in ArcGIS Server Manager or ArcGIS Server Admin.
ENH-000124947	Add the option to change the highlight color for highlighting records and features when showing selected records
ENH-000126018	Rows in the details section of a report should grow or shrink according to the amount of text in a particular group.
ENH-000126341	Please provide a way to create/enable map series for a layout using only python
ENH-000127237	Requesting the ability to include EPSG code under Spatial Reference as dynamic text in layout for ArcGIS Pro

<b>Issue</b>	<b>Description</b>
ENH-000127947	The ArcGIS Pro documentation does not state that changes made to the alias of a field from the content pane will not propagate to the underlying Data source
ENH-000129497	Provide the option to choose to retain CAD text as annotations, before converting them to labels in ArcGIS Pro.
ENH-000129957	Provide the option to display graphical output in Multi-Distance Spatial Cluster Analysis Tool in ArcGIS Pro
ENH-000130289	Provide the ability to automate the process of creating bookmarks in ArcGIS Pro.
ENH-000131766	Request for the ability to open the attribute table of a map service sub layer in ArcGIS Pro
ENH-000132150	Provide a tool or add in that can be used to update the expression use in the calculate field.
ENH-000134680	Allow the ability to update the Service Definition of a Feature Service (hosted/non-hosted) in ArcGIS Pro.
ENH-000135380	Provide the ability to switch license levels in ArcGIS Pro 2.6.1 in a citrix environment as it prompts an error message "Licensing configuration is disabled when multiple ArcGIS Pro are running" while trying to switch between levels in a concurrent use environment
ENH-000136480	Add 'ArcMap's 'Export Map Styles' command into ArcGIS Pro to save .stylex of current symbology
ENH-000136843	Enhance the matrix heat chart type to include temporal binning options
ENH-000137016	Create a Pairwise Eliminate Tool, or Expose Eliminate to the Parallel Processing Factor
ENH-000137449	Using the 'KML to Layer' tool assign the feature dataset and feature class with the same name assigned to the file geodatabase
ENH-000137532	Provide the ability to index specific folders on network drives in ArcGIS Pro.
ENH-000137736	Request to add the functionality to show all values, even the ones not part of the domain code in Select by Attribute on a domain field in ArcGIS Pro
ENH-000140293	Allow the user the ability to delete the Status, Score, or Matchaddr fields in the Geocode Output Table
ENH-000140789	Error message produced by the "Create Database User" tool should be more descriptive - specifying the exact reason why it failed (e.g. because double quotation marks are needed on some Oracle passwords).

<b>Issue</b>	<b>Description</b>
ENH-000141358	Require ArcGIS Pro to Indicate When a Layer is Unable to Draw (Similar to ArcMap Error Messaging)
ENH-000141386	Improve folder selection in the Output Folder Window when selecting an Output Location for projects and geoprocessing tools in ArcGIS Pro
ENH-000141517	Support Reports and advanced TextElements with default and custom print services.
ENH-000141904	The traverse polygon does not focus on the vertex when clicking Flash.
ENH-000142266	Allow for the alteration of field names in the Make Feature Layer tool.
ENH-000142433	Add join support to mobile map packages
ENH-000143065	Allow feature dataset as supported output data types parameter in geoprocessing service
ENH-000143513	Implement the functionality of X-Ray in ArcGIS Pro
ENH-000144085	Provide an ability to manage the limit of indexing log size
ENH-000144806	Establish the recommended extent for an area of interest used for a Spectral Chart.
ENH-000144977	Please update the MKL Package being used in ArcGIS Pro to 2020.0.1 or later in a new release of Pro.
ENH-000146682	Allow users to manually save edits when editing non-versioned data in an enterprise geodatabase in Pro
ENH-000147174	Fine-grain access to properties and methods for manipulating TIN Datasets with ArcGIS Pro SDK
ENH-000147176	Provide tools to ingest flight logs/camera information from popular drone manufacturers to create the necessary metadata file for the Video Multiplexer tool in Image Analyst extension
ENH-000147830	Please improve Error 160277 to include messages identifying the troublesome row or attribute when running Evaluate Rules tool.
ENH-000149135	Modify auto-suggest behavior for Quebec province addresses to return french notation by default
ENH-000149397	Prevent the cursor from reverting to adding graphics/text elements in a Layout when the "Keep the last active tool" setting is turned on and Selection mode is chosen.
ENH-000149959	Update the monotonicity tool to fix errors in ArcGIS Pro
ENH-000150811	Create a toggle in the ArcGIS Pro Options to enable that the toolboxes in the Catalog Pane are displayed by the Label instead of the Name
ENH-000151003	Provide the ability for ArcGIS Enterprise Portal administrator to control how long can the users take the ArcGIS Pro named-user license offline.
ENH-000151009	ArcGIS Pro to have the similar Table Appearance option like ArcMap

<b>Issue</b>	<b>Description</b>
ENH-000151384	Request to open up the default folder that has been set when using the browse button inside the toolbox in ArcGIS Pro.
ENH-000151809	Tool to Compact a Mobile Geodatabase
ENH-000151998	Please add documentation to ArcGIS Pro Roads and Highways resources stating how true curves are handled by LRS tools.
ENH-000152024	When a Geographic Transformation is applied in a tool environment, the Transformation method applied needs to be saved in the tool History.
ENH-000152069	Implement the "Show live traffic only" option in ArcGIS Pro
ENH-000152635	Add "Save As SD" option to overwrite an existing service from ArcGIS Pro to ArcGIS Enterprise
ENH-000152717	Requesting the same functionality ArcObjects' ISurface.GetLineOfSight in Pro SDK for.NET.
ENH-000152845	Allow the Extract Multi Values to Points tool to retrieve the band names / aliases from the input raster, and populate those to the input point feature class
ENH-000152961	Remove unexcepted postal code ext in search places index for text.
ENH-000153937	Request the Hebrew layout with legend to be from right to left in ArcGIS Pro
ENH-000154095	Provide a refresh function for Vector Tile Layer.
ENH-000154113	Improve processing accuracy when using Control Point on Drone2Map 2022.1.2
ENH-000154511	Provide the ability to temporally select data visualized in ArcGIS Pro's temporal profile chart.
ENH-000154705	Save to Layer File (Data Management) tool documentation is outdated or missing information
ENH-000154806	Support for OGC Geopackage and MEMORY-Workspace as Output for the GP-Project Tool
ENH-000154938	Improve latency of the World Geocoding Service when geocoding Korean addresses.
ENH-000155062	Please allow the "Convert Time Field" to convert a Date field into another Date field type.
ENH-000155305	Improve documentation to instruct users to include administrative zones or a location parameter in their request when candidates are not returned in a findAddressCandidates request due to a low candidate match score.
ENH-000155516	Update the documentation of 'Upgrade Dataset' to mention that versioned annotation and dimension feature classes can be upgraded if we temporarily unregister them as versioned

<b>Issue</b>	<b>Description</b>
ENH-000155654	Give functionality of to list all databases connection of a ArcGIS pro project using python
ENH-000155804	Clarify documentation on "Visual differences in imported map documents" to state that small features may not display at small scales in ArcGIS Pro.
ENH-000156069	Provide a plan and estimated implementation date to have magic keys working for China/Korea without separately requiring the country code
ENH-000156085	Required adequate clarification on the tool tip for 1:1 zoom in the layout in ArcGIS Pro
ENH-000157191	The documentation for delete management tool must be improved
ENH-000157489	Please expand the "Use web feature layers" ArcGIS Pro documentation to include more information on pagination.
ENH-000157603	Elaborate the 'Database driven feature binning' section in Aggregate features into bins documentation: <a href="https://pro.arcgis.com/en/pro-app/latest/help/mapping/layer-properties/aggregate-features-into-bins.htm">https://pro.arcgis.com/en/pro-app/latest/help/mapping/layer-properties/aggregate-features-into-bins.htm</a>
ENH-000157897	Better explanation about when it is appropriate to use the "Within a distance" versus the "Within a distance geodesic" match option in the Spatial Join (Analysis) geoprocessing tool documentation
ENH-000158546	Add the ability to treat native VPF data as a supported data type in ArcGIS Pro
ENH-000158817	Provide the ability to programmatically set the Preferred City Name and Preferred Street Name options using ArcPy when creating a Locator in ArcGIS Pro.
ENH-000158836	Provide unique extended codes when magicKeys no longer correspond to the current release.
ENH-000159209	Experience Builder's Print Widgets don't recognize the dynamic text box added to custom layouts when adding any other text inside the text box.
ENH-000159332	Request to add subaddress support for Belgium in the Create Locator tool.
ENH-000159920	Allow the capability to not show the "Search currently in progress. Cancel current search?" prompt when doing geocoding with LocatorManager.GeocodeAsync.
ENH-000160007	Provide a list of extended error codes in the Geocoding API reference.
ENH-000160071	Allow valid token to be passed via geoprocessing tool called by Python when ArcGIS Pro is signed out.

<b>Issue</b>	<b>Description</b>
ENH-000160337	Provide an ability to support multiple multi-factor authentication (MFA) of the Autodesk BIM cloud connection in ArcGIS Pro.
ENH-000160339	Requesting more consistency in direction numbering, and dependable exit information for default "Desktop"-style Directions pertaining to roundabouts.
ENH-000160725	Improve the documentation of reverse geocoding output fields to indicate supported and unsupported output fields.
ENH-000160755	Create documentation about dealing with schema changes with parcel fabric that is published as a feature service.
ENH-000161760	Within the Match Options for a locator, we would like to add the option in the Categories to Support for blocks to be a selectable parameter.
ENH-000162057	Allow the use of the ISO 8601 date format in a map service.
ENH-000162059	Map services to support 64-bit ObjectIDs and Big Integer field types.
ENH-000162132	Unable to publish catalog layers as ArcGIS Enterprise map services and by reference, feature services.
NIM098715	The Inverse Distance Weighted (IDW) tool causes ArcMap to freeze or crash with specific data when the processing extent is modified to a dataset in port 299946.
