

Mac, iPad, iPhone and Apple TV Management Solutions

FOR SCHOOLS OF ANY SCALE

The Apple Management Experts

Since 2002, Jamf has been helping schools around the globe succeed with Apple. Long before Apple became the world's most valuable brand, we provided IT and educators with the ability to automate the tasks associated with device deployment and management – all while empowering students to be more creative, productive learners.

Whether you've been using Apple for years and have thousands of devices in your schools, or are just beginning to integrate Apple devices into your learning programs, we offer two solutions that are tailor-made for the modern classroom. Jamf helps schools engage with students in new ways and deliver an active learning environment with Apple devices.

Why use Jamf?

No platform offers better security or delivers a better learning experience than Apple. And no tool manages Apple devices better than Jamf School or Jamf Pro.

ZERO-TOUCH DEPLOYMENT

COLLECT DYNAMIC INVENTORY

Monitor hardware and software distribution by user or device, for more productive planning and budgeting.

REDUCE RISKS AND PROTECT RESOURCES

Leverage the world class native security tools that Apple builds into every device.
